

# Judi in Eligibility

*Leverage Judi for increased compliance: expedited, high quality, structured decision-making on centralized patient eligibility determination that can eliminate an entire category of important protocol deviations from your trial.*

## A Unique Solution for Patient Eligibility Review

With FDA's recent release of its draft guidance on Protocol Deviations and the focus the guidance places on the implementation of Quality by Design programs to eliminate important deviations, the need for an efficient and thorough review of eligibility has never been more crucial for the success of a trial.

**Judi in Eligibility** simplifies and automates central review processes, allowing project teams to swiftly collect and analyze a wide range of data types to reach a final determination.

## Gain Insight to Manage Screening

Designed to streamline and expedite the eligibility screening process, whether performed by your internal medical team or by an external expert panel. The Judi collaboration tool provides specific visibility to different stakeholders to ensure an accurate and timely determination with complete transparency and a clear audit trail.

## Flexible, Configurable Platform

Conforms to your process for eligibility determination Judi is always configured to match your SOPs at the outset to determine accurate patient eligibility. With eCRFs, dashboards, reporting, and interactive tools, the platform makes the process efficient, compliant, reliable, and ultimately more successful.

## Enhance Eligibility in Your Trials

Efficiently manage the eligibility review process for your trial. By centralizing decision-making around patient enrollment and implementing necessary checks and balances to eliminate enrollment bias, you can ensure close adherence to protocol inclusion and exclusion criteria.

Centralized eligibility review promotes protocol compliance, protects patient safety and enhances the reliability of conclusions on effectiveness. Judi helps you **get this right every time**.

| KPI – Eligibility Committee Workflow                                 | Cycle Time for Manual Process | Median Cycle Time in Judi | Efficiency Gain                    |
|----------------------------------------------------------------------|-------------------------------|---------------------------|------------------------------------|
| <b>Overall Cycle Time from Site Request to Enrollment Decision</b>   | <b>9 calendar days</b>        | <b>2.1 calendar days</b>  | <b>77% reduction in cycle time</b> |
| Cycle Time from Site Request to Enrollment Dossier Complete          | 5 calendar days               | <b>1.13</b> calendar days |                                    |
| Cycle Time from Enrollment Dossier Complete to Submission for Review | 1 calendar day                | <b>0.0</b> calendar days  |                                    |
| Cycle Time from Enrollment Dossier Complete to Enrollment Decision   | 3 calendar days               | <b>0.97</b> calendar days |                                    |
